GUTTA PERCHA TUBING.

THE attention of Architects, Builders, &c. is requested to the following important letter

From the Rev. DANIEL C. DELAFOSSE,

SHERE RECTORY, NEAR GUILDFORD.

"May 11th, 1852.

"GENTLEMEN,—In reply to your communication relative to the Gutta Percha Tubing laid down in one of my wells, I have to state that as yet it has fully answered the purpose to which it was applied, and has proved far more durable than the leaden pipes which were hitherto used.

"The fact is, my spring water is strongly impregnated with iron, which *corrodes the lead*, and causes holes in the pipes, so that the air getting in, prevents the pumps from acting properly. The only inconvenience that I experienced from the use of the Gutta Percha Tubing was, that it gave, for a week or so, an unpleasant taste to the water; but after this brief space had elapsed, the water passing through the tubes was as clear and tasteless as that which had hitherto been raised through the leaden pipes. A year, I think, has nearly elapsed since I tried your pipes for the first time, and as no damage has hitherto occurred to the one now in use during that period, I have reason to hope that the evil of the leaden pipes will be permanently cured; or at least that it will take a far longer time to injure the Gutta Percha Tubing than I have found to be the case as regards the lead.

"Yours, &c. "D. C. DELAFOSSE.

"To the GUTTA PERCHA COMPANY."

N.B.—The Company's Illustrated Circulars, containing Instructions to Plumbers for joining tubes, lining tanks, &c. will be forwarded (post-free) on receipt of three postage stamps.
